

Job Description

Job title: Frontend Developer
Location: H-141, Sector 63, Noida, U.P., 201301
Terms: Internship
Salary : As per interview

About us: Copious Infotech is a rapidly growing software and information technology consulting company that provides innovative software solutions to business clients in India. Founded by professionals with a vision to deliver cutting-edge consulting services and the latest in software technology, Copious Infotech is dedicated to supporting the business community both nationwide and beyond. The founders have established professional ties with several leading companies, which enhances their ability to offer top-tier services

About the role:

- Join a dynamic team to build and maintain web applications using NEXT JS.
- Gain hands-on experience with modern frontend frameworks and technologies.
- Contribute to all phases of the software development lifecycle.

Responsibilities:

- Feature Development: Build and maintain responsive web pages using Next.js (App Router).
- UI/UX Implementation: Pixel-perfect conversion of Figma designs into functional components using Tailwind CSS and ShadCN UI.
- State & Data: Manage application state and integrate RESTful APIs to ensure a seamless data flow.
- Code Quality: Participate in code reviews, learn to write "clean code," and document your logic.

Qualifications:

- Academic Standing: Currently in the final year of a technical degree (2026 Grad preferred).
- Tech Stack: Strong grasp of JavaScript (ES6+) and React fundamentals.
- Portfolio: A GitHub profile or 2-3 personal projects demonstrating your ability to build layouts.
